

2016 WER Contest – Rule Modification

As to encourage participants to use the time given for each round and complete more tasks, the penalty of “Touch Robot outside of the Base”(-5 points each time) will be changed in the 2016 WER contest.

We’ll reward the robot that runs automatically. During each round (3 rounds in total) of the contest, the robot will be given 4 points boost if the participants haven’t touched the robot outside of the base at all; 3 points if touch once; 2 points if touch twice; 1 point if touch for 3 times; no points if touch for 4 times or more.
